

# Peixiang Tan

## EDUCATION

<b>University of California, Los Angeles</b> <i>Bachelor of Science in Mathematics</i>	Los Angeles, United States <i>Jun. 2022</i>
<b>University of Copenhagen</b> <i>Master of Science in Mathematics</i>	Copenhagen, Denmark <i>Jul. 2024</i>
<b>University of Amsterdam</b> <i>Exchange</i>	Amsterdam, Netherlands <i>Fall. 2023</i>

## INTERNSHIP & EXEPERIENCE

<b>UC Davis, School of Medicine</b> <i>Davis, United States</i>	Supervisor: Lihong Qi <i>Summer 2020</i>
<ul style="list-style-type: none"><li>Conducted data analysis on the radiotherapy outcomes of patients using SAS</li><li>Learned and utilized the chi-square test, and examined whether the data results supported the related hypotheses</li></ul>	
<b>E-Fund Management</b> <i>Guangzhou, China</i>	<i>Summer 2022</i>
<ul style="list-style-type: none"><li>In July 2022, participated in the E-Fund “2022 Elite Intern Training Camp” and received the “Outstanding Trainee” award</li><li>Study the classical theory from Behavioral Finance through the book “Irrational Exuberance” and “A Random Walk Down Wall Street”</li><li>Collect the data from China’s stock market and apply the theories</li><li>Make and present a summary report “On Behavioral Finance”</li></ul>	

## RESEARCH PROJECT

<b>UCLA</b> <i>Quantum Group and Coboundary Category</i>	<i>Summer 2022</i>
<ul style="list-style-type: none"><li>We study the representation of quantized enveloping algebra of Kac-Moody Algebra <math>U_q(\mathfrak{g})</math> when <math>q</math> is the root of unit or other complex number</li><li>when <math>q \rightarrow \infty</math>, we study the crystal base of <math>U_q(\mathfrak{g})</math> and the coboundary structure of the category of crystal base</li></ul>	
<b>University of Copenhagen</b> <i>Quiver Representations and Coherent sheaves of <math>\mathbb{P}^1</math></i>	Supervisor: Benjamin Briggs <i>Apr.-Aug. 2023</i>
<ul style="list-style-type: none"><li>This project is about quiver representation and its connection to the derived category of coherent sheaf via Tilting theory</li><li>In particular, we study Beilison’s thesis to show that there is a derived equivalence between coherent sheaf of <math>\mathbb{P}^1</math> and representation of Kroneck quiver</li></ul>	
<b>University of Copenhagen</b> <i>A Beginner’s Guide on Support Theory via Tensor Triangulated Category</i>	Supervisor: Benjamin Briggs & Henrik Holm <i>Feb.-Jun. 2024</i>
<ul style="list-style-type: none"><li>This is my master’s thesis. In this thesis, we study the Balmer spectrum of tensor triangulated category and how to generalize the associated support of the Balmer spectrum to rigidly-compactly generated tensor triangulated category.</li><li>We also applied the machinery we developed to classify the localizing subcategory of <math>\mathcal{D}^{\text{per}}(R)</math> when <math>R</math> is a noetherian ring</li></ul>	

## SEMINAR TALK

<b>La conjecture de Weil</b> , University of Amsterdam	<i>Nov. 2023</i>
--	------------------

## SCHOLARSHIP

<b>Erasmus Grant</b> , Received from European Union	<i>Sep. 2023</i>
---	------------------

## CONFERENCE ATTENDED

<b>Cluster Algebras and Representation Theory</b> , University of Copenhagen	<i>Nov. 2022</i>
<b>Topological Hochschild Homology and Zeta Values</b> , University of Copenhagen	<i>Jan. 2023</i>
<b>Continuous K-Theory</b> , University of Copenhagen	<i>Jun. 2024</i>
<b>Rank Conjectures Across Algebra and Topology</b> , University of Copenhagen	<i>Jun. 2024</i>

## COURSES & SKILLS

Probability Theory, C++, Java, Network Science and Graph theory, Automorphic Form, Functional Analysis, Real Analysis, Complex Analysis, Rational Point of Variety, Automorphic Form
--
